Education

Government College of Engineering, Thanjavur (Anna University) B.E. in Electronics and Communication Engineering	Sep 2023 – May 2026 CGPA: 8.1/10
Government Polytechnic College, Krishnagiri Diploma in Electronics and Communication Engineering	Jun 2021 – May 2023 Score: 89%

Skills

Programming Languages:	Python, JavaScript
Frontend Development:	HTML5, CSS3, React.js, Vite
Backend Development:	Node.js, Flask, Django, REST API Development
Databases:	MySQL(SQL), MongoDB (Basic)
AI & Machine Learning:	NumPy, Pandas, Matplotlib, Prompt Engineering, LLMs, RAG, AI Agents
Cloud & DevOps:	Git, GitHub, Postman, Docker (Basic), n8n Workflow Automation
Computer Fundamentals:	Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, SDLC, Operating Systems, Computer Networks

Professional Experience

ACADERS — Python Full Stack Developer Intern	Feb 2026 – May 2026 — Bengaluru
– Developed full-stack web apps using Python (Flask), React.js, and SQL — end-to-end across 2+ product modules. – Engineered RESTful backend services with structured code patterns, improving maintainability and features. – Contributed to real-time feature development and streamlined Git workflows for team collaboration. – Gained practical exposure to the Software Development Life Cycle (SDLC) and Agile development practices.	

Projects

AI-Powered Document Assistant — Python, Flask, React.js GitHub Demo	Apr 2026
– Built a Flask backend integrating Gemini API to generate context-aware answers from uploaded PDF documents. – Created a React.js and Vite chat interface for multi-turn conversations with streaming responses. – Implemented an end-to-end document retrieval workflow to process uploaded PDFs and support NLP-based on question. – Eliminated manual searching across 100+ pages through AI-powered interactions.	
PG Tenant & Facility Management System — MERN Stack & AI Agent Development using n8n GitHub Demo	Mar 2026
– Designed a full-stack MERN platform with dedicated admin and tenant portals to digitize complaint management. – Implemented 5+ REST APIs with JWT authentication for tenant, complaint, and user management operations. – Integrated AI-agent with standalone n8n Cloud workflow for automated rent reminder emails, improving payment follow-ups and system maintainability.	
AI-Based Rider Helmet Safety Monitoring System — Python, YOLOv8, OpenCV GitHub	Jan 2026
– Developed a real-time helmet detection system using YOLOv8 to identify riders' faces and classify helmet-wearing status from live video feed. – Implemented a speed-control logic that enforces a maximum speed limit of 25 km/h when a rider is detected without a helmet, and allows normal speed when compliant. – Achieved reliable detection accuracy across varying lighting and distance conditions.	

Awards & Leadership

- **Department Topper (1st Rank)** – Awarded for academic excellence with INR 10,000 cash prize.
- **Internship Recognition** – Recognized for fastest product manufacturing Duo.
- **Design Committee Head (ECE)** – Led planning and execution of departmental events and activities.
- **ECE Department Logo Designer** – Designed the official ECE department logo using multiple digital design tools, establishing a consistent visual identity adopted across 5+ departmental events, posters, and digital communications.

Certifications

– Data Structures and Algorithms in Python View	Simplilearn — Apr 2026
– Prompt Engineering: How to Talk to AI View	LinkedIn — Aug 2025
– TCS iON Career Edge – Young Professional View	TCS iON — Jan 2025
